Basically, you cannot add a new user nor change their roles
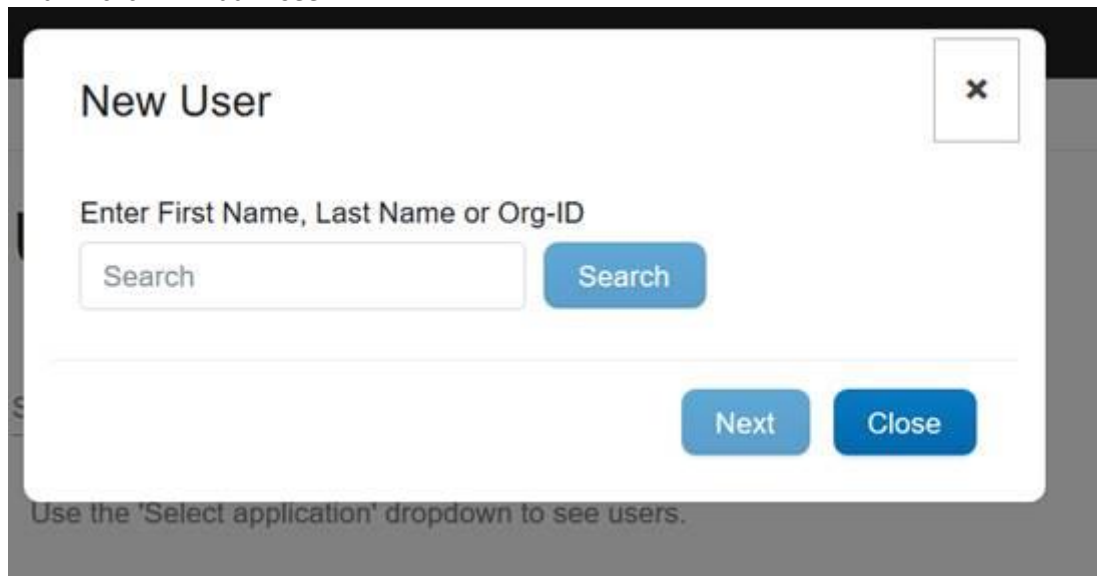

I used Image:          nexus3.onap.org:10001/onap/portal-app:3.2.0-STAGING-latest
As the "demo" user and selecting "Users" from the left menu
I see

And if I click in "Add" I see

If I first select an application before clicking on "Add"
Like:

## Users

Select Application
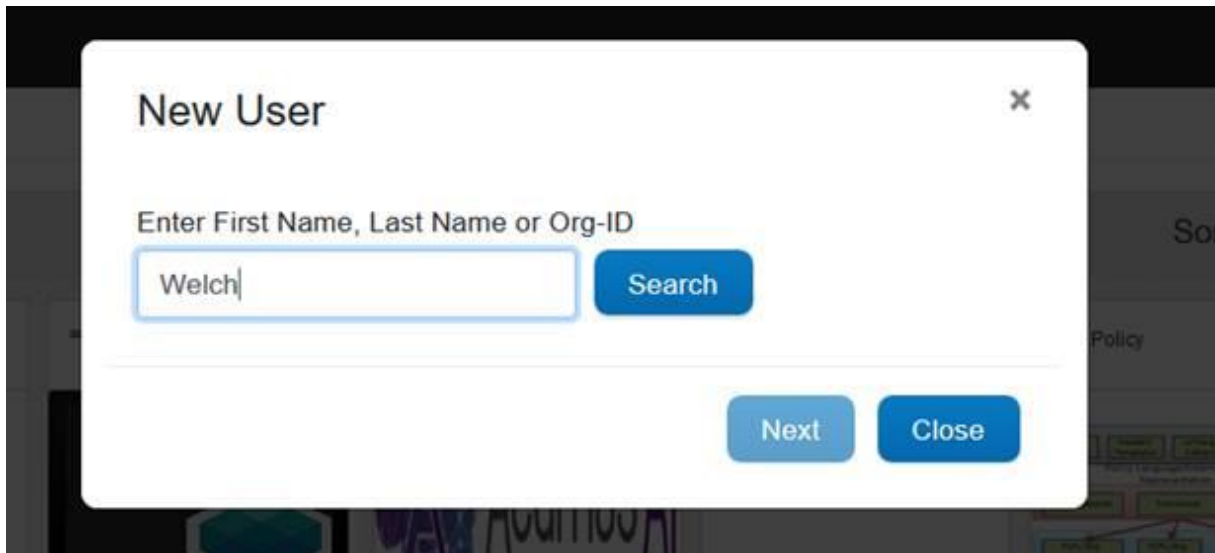

A&AI UI ▾    Search in entire table

+ Add

No users found. Select "Add User" to add a User to the application.

Nothing happens (at first)

BUT when I click on another entry in the left menu (as if I was leaving the "Users" page), THEN the "New User" screen popup up

### New User

×

Applications

Enter First Name, Last Name or Org-ID

Search    Search
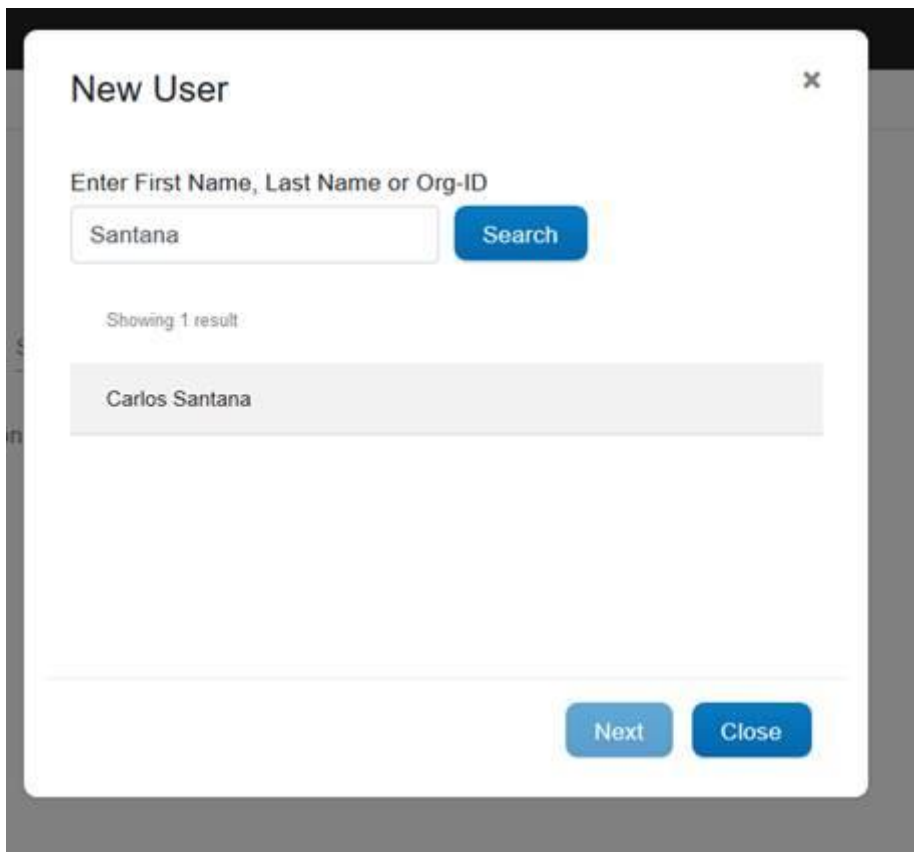

Sort by: Nam

Next   Close
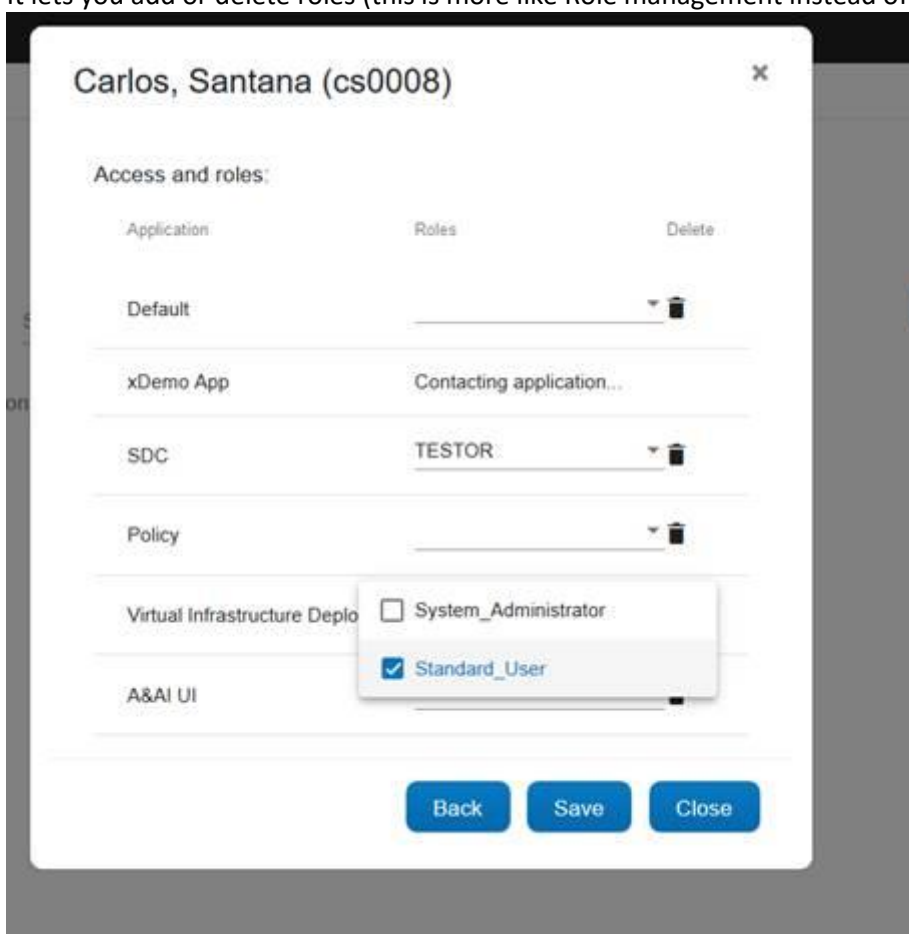

If you try and Add a New User like

You get an error message

If you put an existing user from the database you see

It lets you add or delete roles (this is more like Role management instead of User Management

You see

Carlos, Santana (cs0008)                                                              ×

Access and roles:

| Application | Roles | Delete |
|---|---|---|
| Default | No changes | 🗑 |
| xDemo App | No changes | 🗑 |
| SDC | No changes | 🗑 |
| Policy | No changes | 🗑 |
| Virtual Infrastructure Deployment | Updating application... | 🗑 |
| A&AI UI | No changes | 🗑 |

Back    Save    Close

But eventually it fails

Error: javax.crypto.BadPaddingException: Given final block not properly padded. Such issues can arise if a bad key is used during decryption.

Close

ation' dropdown to see users,
