Hello Vasyl,

Of course I remember you, I hope you are doing well!

I've watched the video and yes you've found license items with empty information in the csar even though you selected external license

My understanding is that external license means that the vendor of that software is managing it differently – can be under other agreements – and so systems that would parse this empty license model may get confused

Christophe

Subject: Optional license in onboarding still adding vendor items even if external license is selected

Hi Christophe

I'm SDC committer from Ericsson (maybe you remember me)

We are in the process of reducing bug count, and I came across this one <https://jira.onap.org/browse/SDC-3601> opened by you.

Any chance you remember any additional info rg this ticket.

Can you check screencast I recorded to confirm correct procedure.

Thank you in advance

Vasyl Razinkov

Lead Software Engineer

Ericsson Software Technology
