

ASD Upgrade

Changes in SO Project

Upgrade End Point

- New end point for upgrade

```
@Path("/{version:[vV][7]}/serviceInstances/{serviceInstanceId}/cnfs/{cnfInstanceId}/upgrade")
```

- Request body similar to the request body in create CNF instance

Building Blocks/Workflows

- Existing WorkflowActionBB and ExecuteBuildingBlock workflows are called first without any changes.
- New workflow to be introduced to invoke CNFM for upgrade which will be called via ExecuteBuildingBlock in BB to Execute task.
- Database inserts for the new workflow in catalogdb for northbound_request_ref_lookup, orchestration_flow_reference and building_block_detail tables.
- Existing MonitorCnfmJob workflow can also be used.
