Subject: RE: Change in ...services[master]: Add ml-prediction-ms with basic build infrastruct.

Hi Sendil – Thanks for letting know. Considering this is the first rls for this new ms introduction, if no further support is available we could either revert the patch submission or mark delivery as PoC.

We'll discuss on the next meeting with other committers and decide next steps.

Regards,
Vijay

Hi Vijay, Since we got involved in other internal Customer Projects, will not be able to contribute further on ONAP activities.

Thank you for the collaboration.

Regards,
Sendil

Hi Sendil/Niranjana – Any update on this container validation and release into OOM?

Thanks,
Vijay

Hi Sendil,

For a component to be included in ONAP release, corresponding helm chart updates and container (released version) must be also updated into OOM repository.

If the snapshot container is verified, you can follow process for container release from this wiki - <https://wiki.onap.org/pages/viewpage.action?pageId=68545910> (basically a new yaml to be submitted under releases directory in dcaegen2/services). (once the change is merged, docker snapshot gets pushed into nexus3/release repo).

And for helm charts – you need to add sub-directory under OOM repo here - <https://github.com/onap/oom/tree/master/kubernetes/dcaegen2-services> and contribute the helm charts. Almost all DCAE components use common template and only differs by values.yaml (which is specific to application configuration).

Niranjana is aware of this process - hope she can assist you on this delivery.

If any other questions though, let me know.

Regards,
Vijay

Subject: Re: Change in ...services[*master*]: Add ml-prediction-ms with basic build infrastruct.

Hi Vijay, I am not aware about the process involved to deliver new container into OOM for London. As you know, the earlier internal team also moved into other projects.

Seek for your help on this activity.

Please note resending this email since there was undeliverable message

Regards,
Sendil
